Analytics

Google Analytics is Google's analytics tool that helps website and app owners to understand how their visitors engage with their properties. It may use a set of cookies to collect information and report site usage statistics without personally identifying individual visitors to Google. The main cookie used by Google Analytics is the '_ga' cookie.

In addition to reporting site usage statistics, data collected on Google properties by Google Analytics may also be used, together with some of the advertising cookies described above, to help show more relevant ads on Google properties (like Google Search) and across the web and to measure interactions with the ads we show.

RTB Callout Data Restriction. Buyer may store the encrypted cookie ID and mobile advertising identifier for the purpose of evaluating impressions and bids based on user-data previously obtained by the Buyer. All other callout data except for Location Data may be retained by Buyer after responding to an ad call for the sole purpose of forecasting the availability of inventory through the Authorized Buyers program. Buyer is permitted to retain callout data only for the length of time necessary to fulfill the relevant purposes stated above, and in any event, for no longer than 18 months.

Unless Buyer wins a given impression, it must not: (i) use callout data for that impression to create user lists or profile users; (ii) associate callout data for that impression with third party data; or (iii) share rate card data in any form, including but not limited to aggregate form, with third parties.

Location Data Restriction. If Buyer receives information through the Authorized Buyers program that identifies or can be used to infer an end user's precise geographic location, such as GPS, wifi or cell tower data ("Location Data"), then Buyer is permitted to use such information solely for the purpose of bidding on the applicable impression and Buyer is permitted to retain such information solely for the length of time necessary to fulfill that purpose.
